PROJECTS

Novuskin Med Spa

· Description: At Novuskin, we're a unique aesthetic treatment center that believes no matter where you're at in your skincare journey, you're beautiful, just the way you are. Taking care of your skin is about so much more than just how you look. Skincare is skin health. When our skin is healthy, we feel more confident and powerful.

· Technologies Used: List the technologies, tools, and frameworks utilized in application, ReactJS, Redux, JavaScript, HTML, CSS, Bootstrap-4.

· Responsibilities: As a frontend developer, I have likely created a dashboard that serves as a central hub for displaying various data and insights related to sales, leads, revenue, spend, and other relevant metrics. I have designed reusable components to ensure consistency and modularity within the dashboard, making it easier to maintain and expand the functionality.

· Dashboard and Reusable Components:

· Graph and Chart Implementation

· Data Export in CSV Format

· RESTful API

· JWT Token-Based Authentication

Apprent

· Apprent is a multifamily maintenance software for property managers, leadership, technicians, and residents.
· As a Fullstack developer, I have likely add new functionality and implement 3rd parties property solutions that serves as a central hub for displaying various data and insights.
· Implement third party property management RESTfull API and web-hooks for get data from third party application.
